

**Name:** Sahatchai Wanawongsawad (Mr.)      **More Photos:** See more photographs in [www.tagged.com/sahatchaiw](http://www.tagged.com/sahatchaiw)  
**Nationality:** Thai      **Race:** Chinese      **Religion:** Make a wild guess      **Sport:** Judo  
**Born:** October 3, 1956 in Bangkok, Thailand  
**Movies:** Star Treks (original), Scanners, The Fly (I,II), Quest for Fire (French), Life on Earth (BBC), Tiger Mask (Japanese Cartoon), Crouching Tiger Hidden Dragon, The Storm Riders (H.K.), Star Wars, Superman (I,II), SIS' Missions (English Series), Little Buddha, Saving Private Ryan, Training day, Shine, Apocalypto, etc.  
**Directors:** David Cronenberg, Leonard Nimoy, George Lucas, Steven Spielberg, Mel Gibson, Ung Lee, etc.  
**Movie Stars:** Charlie Chaplin, Christopher Reeve, Robert Redford, Leonardo DiCaprio, Tom Hanks, Denzel Washington, Keanu Reeves, Jodie Foster, Roger Moore, Sean Connery, Kevin Costner, Nicolas Cage, etc.  
**Music:** English, Thai, Italian, French, Spanish, Chinese and Japanese Songs, Classical Music  
**Singers:** Petula Clark, Conny Francis, Nana Mouskouri, John Denver, Engelbert Humperdinck, Tom Jones, Pavarotti, etc.  
**Most Favorite Songs:** You can't keep me from loving you (Petula Clark) & Ruk Mod Jai (Foan Thanasontorn, Thai).  
**Writer:** Martin Gardner (Mathematical Games in *Scientific American*)  
**Artists:** M.C.Escher, Vincent van Gogh, Salvador Dali, Leonardo Davinci, Michael Angello, Pablo Picasso, etc.  
**Men-to-Remember :** Dr.Sadiq Addalla (Libyan Scientist), Dr.Wudhibhan Prachyabrued (Thai Physicist)

**Believing :**

Believe	Not Believe
1) Aliens in other star systems	1) Aliens on Earth
2) Siva, Vishnu and Brahma are the creators of the Universe.	2) One God
3) Reincarnation	3) One Life
4) Buddha found the way how to cease reincarnation by going to nirvana.	4) Buddha is a Vishnu's Avatar.
5) Teleportation (Time axes-coincided)	5) Time Traveling (Time axes-not coincided)
6) Robots will stay with human in everyday life like cars in the future.	6) Robots will have imagination.
7) Natural selection is not the cause of evolution of life. The direct cause of evolution of life occurs on molecular level in the fertilized egg or ovum during the developmental period of creature and plant. There are ways for eggs and sperms to get information from the environment in order to adapt their offspring to fit with it.	7) Charles Darwin's Theory of Evolution
8) The higher the energy of a system, the more the resistance of nature to suppress that system from having higher energy. Nature will find ways to provide that suppression anyway.	8) Traveling faster than the speed of light
9) Photon holds two opposite and equal charges $\pm \gamma \sqrt{h} \epsilon_0 c$ without mass. (where $\gamma = \text{constant} < 1$ )	9) Magnetic Monopole
10) Statistical Physics of Non-Equilibrium Systems will turn the history of physics to another page in the 21 <sup>st</sup> century.	10) Unified Theory of Physics

## Questions and Answers from my believing and experience.

- 1) Question: Who is the greatest god of all gods?  
Answer: Siva is the greatest god of all gods in the Universe.
- 2) Question: Who is the greatest god on the planets?  
Answer: Brahma who got order from Siva to create living environment on the planets for Angels and Asuras. Earth was not intentionally created for human. Human beings have just been evolving from primates. The direction of human's evolution is to improve sensory perception for the 5<sup>th</sup>D.
- 3) Question: Where are the Angels and Asuras on earth?  
Answer: Everywhere in higher dimensions than the 4D (3 space + 1 time) of which 5 physical senses of human beings and creatures (eyes, ears, nose, tongue, and touch) can not be perceptible.
- 4) Question: Why does Brahma who is the son of Siva and Vishnu look like an old man while Siva and Vishnu look young?  
Answer: Brahma had to work in the time field on the planets while Siva and Vishnu had never. But, the split souls of Siva and Vishnu which came to earth get older and older with time.
- 5) Question: Why does Brahma have 4 faces?  
Answer: The 4 faces of Brahma are able to be rotated, meaning, he has no senses of front nor back, and left nor right. This is a metaphor to teach everyone about how to live together peacefully by means of sincerity (no front nor back) and impartiality (no left nor right).
- 6) Question: Why did Prince Sitthatta (Buddha) have a tremendous effort to find ways how to cease reincarnation of individual by going to nirvana?  
Answer: Because he was shocked when he found that life is not eternal as his father King Sutthotana) had been deceiving him by not allowing him to see birth, aging, illness and death for 26 years. This inspired him by a great deal to find ways how to cease reincarnation. And he found one way.
- 7) Question: Why do Buddhist monks eat meat while they are teaching people that killing is a sin?  
Answer: The prime duty of the Buddhist monks is to hold 227 commandments so that they will be able to deliver food donated by putting food in the bowls of Buddhist monks in the morning to the world of the dead after eating the food. As the soul of the dead needs to eat and they eat meat as do their relatives who donated food which contains meat for the Buddhist monks in the morning. Such food can also be delivered to wait for the donators after dead if the donators did not intend to send it to their relatives in the world of the dead. The point is that in order that the food can be delivered to the world of the dead, the Buddhist monks must eat it. Thus, in the community where people eat meat, the Buddhist monks must eat meat too. But if people in the community are vegetarian then the Buddhist monks shall eat vegetarian food. The excessive food which is given by the monks to poor people shall not be delivered to the world of the dead but became a merit to the donators only. People should not donate food to the Buddhist monks who have already got too much food. Practically, the Buddhist monks shall pour the same kind of food in the same bowl, and every bowl shall be put in the center of the group of Buddhist monks who sit surrounding them as a ring. Then they shall take the cooked rice just enough for each of them to eat into their bowl and shall try to scoop up little food from every bowl just to match the rice they took so that all donated food shall be eaten by the monks and be sent to the world of the dead.
- 8) Question: Will cloning of human make the same original person?  
Answer: No, it won't. Cloning of human body did not clone his/her soul either.
- 9) Question: What is Soul?  
Answer: A soul is an individual life form in higher dimensions than the 4D (3 space +1time) of which the sensory perceptions of humans and creatures can not be perceptible.
- 10) Question: Do plants have soul?  
Answer: Yes, they have but different from creatures and of lower ranks.
- 11) Question: Does microorganism have soul?  
Answer: Yes, in simple form. The souls (not body) of virus/bacteria/diseases are the results of Mantras of Angels, Asuras, Bodhisattvas Kuan-Yin (for HIV), Gods, Goddesses, Naga (for shingles), etc.
- 12) Question: Do the holy-statues have soul in them permanently?  
Answer: No. But a soul can superimpose onto a holy-statue from time to time. A common to medium rank soul can superimpose onto a person and controls his/her body to be the medium. High rank souls do it by grasping at the medium's brain-stem as they are too powerful for the medium to bear.
- 13) Question: Can soul die?  
Answer: Yes. When soul died by being killed in the fight with other soul or by focusing on a very high rank soul, that person (in 4D) will die for real within 3 months. Soul can get old when it is in time field and can be weak or ill. A soul can be split to take one part of split outstanding Karma of that soul when his/her Karma is too much for it to take liability in reasonable times of reincarnation. Low rank souls are opaque while higher rank souls are more transparent. Souls have colors too.
- 14) Question: What is life?  
Answer: Life is a physical body in 4D combined with a soul (life form in higher dimensions than 4D). Thus, a life form is a soul free from body or a soul situated in a body. (Souls are in 5D or more.)
- 15) Question: How many dimensions does the Universe have?  
Answer: Eleven. The higher the dimension, the higher the rank of soul (the original one) is situated there.
- 16) Question: How can we contact souls in the 5D or more?  
Answer: By meditation or by the 6<sup>th</sup> sense (mind). An experienced person can move his/her soul to other places with one end of the soul string still be connected to the crown of his/her head. The longer the distance the more difficult for that person to breathe. Overseas are considered a short distance.
- 17) Question: Does **projective geometry** end at Pascal's theorem (1640 A.D.) and Brianchon's Theorem (1810 A.D.) on hexagon inscribed or circumscribed a conic section?  
Answer: No, it does not. See my articles No. 1 and 3 on this website where 2 and 3 conics play their roles.
- 18) Question: Can we explain the behavior of non-equilibrium systems by existing mathematic?  
Answer: No. **Calculus of non-equilibrium systems** is required together with some physical laws which govern basic behaviors of non-equilibrium systems. My articles on this shall be posted here soon.
